

SET YOUR LINEUPS

Owner, GM or AGM. Nine games a week, and each one locks 30 minutes before puck drop.

Save up to three lines, point each game night at one, and dress the whole week in a click. Fine-tune any single game right up to puck drop.

RULES 5.2 · 5.3 · 8.3

WHERE IT LIVES

Three lines and the whole roster

One page holds three saved lines, the full roster, and a night plan. Building here files nothing. It is the plan your game-night lineups come from.

1

Open Team HQ → Lineup builder

Lineup builder sits under Team HQ in the sidebar. It is the only lineup page in the nav; the per-game page comes later, from its own links.

#/hub/lines

2

Read the board before you build

Three lines, **Top Six**, **Energy** and **Shutdown**, run across the six slots, each with its OVR and the night it dresses.

LINES

Up to three saved combinations you name yourself.

ROSTER

Every rostered player, with the lines he already sits on. Camp players sit at the bottom.

NIGHT PLAN

Point each of the three game nights at a line, then dress it.

Drag onto a filled slot to swap the two players. Drag a slot back onto the roster to clear it. Click works too — player, then slot.

THE BOARD · LEFT WING · CENTER · RIGHT WING · LEFT DEFENSE · RIGHT DEFENSE · GOALTENDER

Click a player, then a slot

3 Click a player, then a slot

Click a card and the message reads “Now click the slot for <player> — any line, any matching position.” Click the slot to fill it; drag a filled slot onto another to swap, or back onto the roster to clear. Then press **Save changes**, and a toast reads “1 line saved.”

4 Watch the outlines

A player may sit on all three lines, and the builder warns rather than refuses. His card is outlined **yellow** when the lines pointed at this week's nights may take him past his weekly limit, and **red** when the games he has already played or been filed for put him over it. Saving then asks you to confirm. The limit itself is enforced when a lineup is dressed. **RULE 5.2**

Yellow	Red	Positions
may go over this week	already over this week	open to everyone

Click a roster card, then the slot, or drag one onto another to swap. Positions are open: anyone on your roster may play any slot, goal included, and the positions a player lists are his preferences (Rule 5.2).

ROSTER · A CAMP PLAYER SELECTED, READY FOR A SLOT

1 line with unsaved changes

Names edit in place. A player may sit on any number of lines. A yellow outline means his lines may take him past his weekly limit; red means he has already played every game his week allows. The limit itself is enforced when a lineup is dressed (Rule 5.2).

Revert

Save changes

UNSAVED · THE BAR TRACKS IT, SAVE CHANGES LIGHTS UP

Saving a line dresses nobody

5 Point each game night at a line

In the Night plan, use each night's **Dresses** picker: Wednesday, Thursday and Friday, three games each. A toast confirms it: “Thursday dresses Shutdown.” Empty lines stay disabled until you fill them.

6 Dress the night, or the whole week

Dress 3 games files that night; **Dress the week (3)** files all nine. Confirm, and each dressing runs the checks. Anything refused is reported by night and the rest still land. **Redress** any night to change it before its lock.

RULE 5.2

A saved line is a plan. A game gets a lineup only when you dress it, and that is where the league's checks run: the weekly cap, suspensions, roster players first, and each game's lock.

FILLED · TAP A SLOT TO CLEAR

Filled from Top Six. Marked not available for this game: Jugg_PRKz (dressed anyway; check they can play)

FILL FROM PLAN · THE UNAVAILABLE ARE SKIPPED AND NAMED

SUBMIT THIS LINEUP?

Your six starters go to the league office and are published to the opponent when the sheet locks, 30 minutes before puck drop. You can change it after that too, right up to puck drop.

Cancel

Submit lineup

SUBMIT · RELEASES AT THE LOCK

7 Open the game and fill it

Nine chips, one per game, so games that lock at different times are reachable on their own.

Fill from Top Six drops in the line the plan points at; a player who marked himself out is dressed anyway and named in the toast, so you can decide. **Auto-fill best available** takes each player at his own position first, and **Clear** empties it.

#/hub/lineup

8 Submit the six

All six slots are required: miss one and you get “**Fill every slot first**”. Press **Submit lineup**.

Your six go to the league office and release to the opponent at the lock.

9 Or the whole night at once

Tick **whole night (3 games)** before you submit and the same six go into every game of that night that has not locked yet.

WHO DRESSES FIRST

Roster players come first

A training-camp player dresses only when no available roster player of the same kind is left out. The sheet publishes at the lock but stays yours to change right up to puck drop.

10 Camp players fill in, they don’t jump the queue

If a roster skater who said **Available** for that game, isn’t suspended and has games left this week is not in your six, a camp skater can’t take a skater’s spot; the same goes for goaltenders. The builder refuses the assignment and names who should play first: “**Roster players come first (Rule 5.2): <player> is available for this game and not in the lineup...**” A roster player who didn’t answer for the game never blocks anyone. **RULE 5.2**

11 The lock publishes, it doesn’t freeze

Each game locks 30 minutes before its puck drop, when your six release to the opponent. You may still change it right up to puck drop, with no penalty; the other club’s front office, its room and the officials are told who came out and who went in. After that the box score is the record. **RULE 5.3**

THE LIMITS

Spread the games

The weekly cap is the only weekly rule, and it is a ceiling, not a quota. The number that matters most is 16: the games a player needs to be dressed in the playoffs.

6

games a week for every active-roster player, skater or goaltender (Rule 5.2)

3

games a week for a training-camp player, at any position (Rule 5.2)

4

games of a playoff series, for every player (Rule 8.3)

16

regular-season games to be dressed in the playoffs (Season 1's published floor). The Road to 16 card on your Roster page tracks it (Rule 8.3)

The box score keeps the count

The site tracks every player's week for you, from what actually happened, and stops you at six.

12

Played games count by the box score

When a game goes final and its box score is imported, the box score is the record: if a player appeared, that game counts toward his week; if he was dressed but sat, it does not. A voided game counts for no one, and neither does a forfeit in which nobody took the ice, so a club that was late costs its players nothing against the cap. A forfeit awarded after disconnections is different: those sittings were played, so they count.

Played

a final game with a box score counts only if he is in it

Filed

a game still to be played counts if he is in your filed lineup

Voided

a voided game counts for nobody

Refused

the seventh assignment, the seventh filing, and any box score that shows more

13

Games still to come count by your filed lineup

Every game you have dressed him for that has not been played yet counts too, so six filed games use up his week even before Friday.

14

At six, the site says no

Try to assign him to a seventh game and the per-game page refuses on the spot: “**<player> has already played or been dressed in 6 games this week — the limit is 6 (Rule 5.2).**” Dressing a night or the week refuses that game the same way and lands the rest. In the playoffs the same count runs against the 4-game series cap.

15

After the game, the box score is checked

A player who appears beyond his six, or who appears without being in the lineup you filed, is reported to the league office automatically and dealt with under Rule 5.3. Play the sheet you filed.

WATCH OUT

The weekly limit is hard: six games for a roster player and three for a camp player, counted from box scores for games played and your filed sheets for games to come. Only the league office can except a player, and very rarely. With three games a night, each locks on its own puck drop, so games two and three can lock before game one is done: reach them by their own chip.

GOOD TO KNOW

The six-game week is checked when a player is **assigned or dressed**, not when a line is saved, so a player can sit on all three lines and you dress the mix. The count behind it is his box scores plus your filed lineups. A playoff lineup with a player short of the season's floor (16 games in Season 1) is refused outright, so use the regular season to get your preferred players there. Server picks and lobby codes are not here; they live on the Schedule desk and the matchup page.
