

SET YOUR LINEUPS

Owner, GM or AGM. Nine games a week, and each one locks 30 minutes before puck drop.

Save up to three lines, point each game night at one, and dress the whole week in a click. Fine-tune any single game until it locks.

RULES 5.2 · 5.3 · 8.3

WHERE IT LIVES

Three lines and the whole roster

One page holds three saved lines, the full roster, and a night plan. Building here files nothing — it is the plan your game-night lineups come from.

1

Open Team HQ → Lineup builder
Lineup builder sits under **Team HQ** in the sidebar. It is the only lineup page in the nav; the per-game page comes later, from its own links.
#/hub/lines

2

Read the board before you build
Three lines — **Top Six**, **Energy**, **Shutdown** — run across the six slots, each with its OVR and the night it dresses.

LINES	Up to three saved combinations you name yourself.
ROSTER	Every rostered player, with the lines he already sits on. Camp players sit at the bottom and may fill any slot.
NIGHT PLAN	Point each of the three game nights at a line, then dress it.

Drag onto a filled slot to swap the two players. Drag a slot back onto the roster to clear it. Click works too — player, then slot.

THE BOARD · LEFT WING · CENTER · RIGHT WING · LEFT DEFENSE · RIGHT DEFENSE · GOALTENDER

Click a player, then a slot

3 Click a player, then a slot

Click a card and the message reads “Now click the slot for <player> — any line, any matching position.” Click the slot to fill it; drag a filled slot onto another to swap, or back onto the roster to clear. Then press **Save changes** — a toast reads “1 line saved.”

4 The groups bind

Aim a player at the wrong group and it refuses in red: “IronWall_31 is a Goaltender — Left Wing needs a forward.” A player may sit on all three lines; the weekly limits are checked later, when a lineup is dressed. **RULE 5.2**

Forward

LW · C · RW

Defenseman

LD · RD

Goaltender

G only

Click a roster card, then the slot — or drag one onto another to swap. Groups bind: forwards fill the wings and center, defensemen the blue line, the goalie the crease. A camp player fills anything.

Save changes

UNSAVED · THE BAR TRACKS IT, SAVE CHANGES LIGHTS UP

Saving a line dresses nobody

5 Point each game night at a line

In the Night plan, use each night’s **Dresses** picker — Wednesday, Thursday and Friday, three games each. A toast confirms it: “Thursday dresses Shutdown.” Empty lines stay disabled until you fill them.

6 Dress the night, or the whole week

Dress 3 games files that night; **Dress the week (3)** files all nine. Confirm, and each dressing runs the checks — anything refused is reported by night and the rest still land. **Redress** any night to change it before its lock. **RULE 5.2**

A saved line is a plan. A game gets a lineup only when you dress it — and that is where the league’s checks run: the weekly cap, suspensions, availability, and each game’s 30-minute lock.

FILL FROM PLAN · THE UNAVAILABLE ARE SKIPPED AND NAMED

SUBMIT THIS LINEUP?

Your six starters go to the league office and release to the opponent's front office at the lineup locks, 30 minutes before puck drop. You can resubmit until the lock.

Cancel

Submit lineup

SUBMIT · RELEASES AT THE LOCK

7 Open the game and fill it

Nine chips, one per game, so games that lock at different times are reachable on their own.

Fill from Top Six drops in the line the plan points at — a player who marked himself out is skipped and named. **Auto-fill best available** takes each player at his own position first, and **Clear** empties it.

#/hub/lineup

8 Submit the six

All six slots are required — miss one and you get “**Fill every slot first — missing ...**” Press **Submit lineup**: your starters go to the league office and release to the opponent at the lock. You can resubmit until then.

9 Or the whole night at once

Tick **whole night (3 games)** before you submit and the same six go into every game of that night that has not locked yet.

Emergency call-up only

Each game locks 30 minutes before its puck drop. After that only management can change it, only as an emergency call-up, and only until ten minutes after puck drop — every player swapped costs the club one in-game penalty, and the other club is told the moment you submit.

10 The game locks at puck drop minus 30

The bar turns to “**Status: Locked · locked 8:30 PM ET (Rule 5.3)**.” Every slot reads **OVR · locked**, and the only control left is **Emergency call-up**.

RULE 5.3

Cancel

CALL-UP ENABLED · THE BAR TURNS RED AND THE CONTROLS COME BACK

11 Swap the no-show, then submit

Enable the call-up, change the one player, and press **Submit emergency call-up**. Each player changed costs the club one in-game penalty, served in that game. The moment you submit, the other club’s front office, its Discord room and the officials desk are told who came out, who went in and what you owe — so the two of you can sort the infractions before puck drop. Change only who you must.

CONFIRM EMERGENCY CALL-UP?

This game already locked. EACH player changed costs the club one in-game penalty, served in this game (Rule 5.3) — the opponent already sees the locked lineup, so change only who you must.

Cancel

Submit emergency call-up

CONFIRM · ONE PENALTY PER PLAYER CHANGED

Spread the games

The weekly cap is the only weekly rule, and it is a ceiling, not a quota. The number that matters most is 16 — the games a player needs to be dressed in the playoffs.

6

games a week — every active-roster player, skater or goaltender (Rule 5.2)

3

games a week — a training-camp player, at any position (Rule 5.2)

4

games of a playoff series — every player (Rule 8.3)

16

regular-season games to be dressed in the playoffs (Season 1's published floor) — the Road to 16 card on your Roster page tracks it (Rule 8.3)

The box score keeps the count

The site tracks every player's week for you, from what actually happened, and stops you at six.

12

Played games count by the box score

When a game goes final and its box score is imported, the box score is the record: if a player appeared, that game counts toward his week; if he was dressed but sat, it does not.

Played

a final game with a box score counts only if he is in it

Filed

a game still to be played counts if he is in your filed lineup

13

Games still to come count by your filed lineup

Every game you have dressed him for that has not been played yet counts too — so six filed games use up his week even before Friday.

Voided

a voided game counts for nobody

Refused

the seventh assignment, the seventh filing, and any box score that shows more

14

At six, the site says no

Try to assign him to a seventh game and the per-game page refuses on the spot: “**<player> has already played or been dressed in 6 games this week — the limit is 6 (Rule 5.2).**” Dressing a night or the week refuses that game the same way and lands the rest. In the playoffs the same count runs against the 4-game series cap.

15

After the game, the box score is checked

A player who appears beyond his six, or who appears without being in the lineup you filed, is reported to the league office automatically and dealt with under Rule 5.3 — so play the sheet you filed.

WATCH OUT

After the lock the opponent already sees your sheet. An emergency call-up costs one in-game penalty **per player changed** — swap two and that is two penalties; moving the same six between positions is none (Rule 5.3). The door closes ten minutes after puck drop: from then the sheet on file is the record, and a player who dresses without being on it is reviewed by the officials against the box score. With three games a night, each locks on its own puck drop: games two and three can lock before game one is done, so reach them by their own chip.

GOOD TO KNOW

The six-game week is checked when a player is **assigned or dressed**, not when a line is saved, so a player can sit on all three lines and you dress the mix — the count behind it is his box scores plus your filed lineups. A playoff lineup with a player short of the season's floor (16 games in Season 1) is refused outright, so use the regular season to get your preferred players there. Server picks and lobby codes are not here; they live on the Schedule desk and the matchup page.
